

# Pump series NMS

## Typical characteristics

- **Multistage pump** in an industrial design
- Ideal for **moderate flow rate** and **high pressures**
- High efficiency, **energy saving**
- **Low NPSH value**
- **Electropolished**, high corrosion resistance

## Technical data

Max. flow	50 m <sup>3</sup> /h
Max. head	16 bar
Max. product viscosity	250 cP
Motor power up to	45 kW

## Applications

The Packo multi-stage pumps can be used as a process pump under the most severe applications in the food and general industry. They can be used as a feeding pump or as a booster in some of the applications.

**Typically used as** a process pump for plate heat exchangers, filters, filling machines, high pressure CIP systems, etc.
